Mann+Hummel - WIX Filtration Service Line for the United States
Call: 1-800-949-6698

Our 1-800 Service has been expanded to better serve our customer's needs. This service is available Monday through Friday from 8:00 AM – 7:30 PM Eastern Standard Time. Closed Saturday and Sunday.

If you know your party's extension, you may dial at any time. For all other calls:

Press 1 – FILTER INFORMATION

If you need assistance with Part Number Interchange, Applications Not Listed in Current Catalogs, Filter Specifications or Attributes including Performance Information, Burst Pressures, Flow Rates, Air Filter CFM Ratings and Dimensional Information.

Further assistance may be needed for Special Applications information, Trouble Shooting and Printed Educational Material.

Press 2 - CUSTOMER SERVICE

If you would like to place an order, check order status, inventory status, backorder questions or new number availability and pricing.

Press 3 – MARKETING

Press 5 –WEBMASTER

E-Learning Website Support

We appreciate the opportunity to provide these services.
Your comments and suggestions are welcome.

The most current application and other information, is also available at: www.wixfilters.com

CROSS REFERENCE WARNING

IMPORTANT: **For reference only. There are no express or implied warranties with respect to products selected by size, feature or invalid cross reference. Warranties only apply to products selected according to vehicle application listing. For non-listed applications, warranty coverage requires a valid OEM cross reference as described in the WIX Limited Warranty. No product has been certified or warrantied for aviation use. No product has been certified or warrantied for filtration of fuel or oil in heating applications**.

This catalog and all information herein supersedes all previous filter catalogs and information material.

Ce service est disponible du lundi au vendredi de 8 h 00 à 16 h 30, heure de l'Est.
Si vous connaissez le poste de votre correspondant, vous pouvez le composer dès maintenant.
Composez 277 – RENSEIGNEMENTS SUR LES FILTRES
Si vous avez besoin d'aide en ce qui concerne la correspondance des numéros de pièce, la disponibilité et le prix des nouvelles pièces, les véhicules non indiqués dans les catalogues en vigueur, les caractéristiques ou les particularités des filtres, y compris les rendements, les pressions d'éclatement, les vitesses d'écoulement, les débits des filtres à air et les dimensions.
Vous aurez peut-être besoin d'aide supplémentaire pour les véhicules spéciaux, le dépannage et la documentation de formation sur papier.
Nous sommes heureux de pouvoir fournir ces services. Nous recevrons avec plaisir vos commentaires et suggestions. Les utilisations et les autres renseignements les plus courants sont également disponibles à www.wixfilters.com

AVERTISSEMENT SUR LES CORRESPONDANCES DE NUMÉROS

IMPORTANT : À titre de référence uniquement. Il n'existe aucune garantie expresse ou implicite concernant les produits sélectionnés par taille, caractéristique ou une équivalence non valide. Les garanties s'appliquent uniquement aux produits sélectionnés en fonction du répertoire des utilisations liées aux véhicules concernées. Pour les utilisations non répertoriées, la couverture de la garantie nécessite une équivalence de FEO valide, tel que décrit dans la Garantie limitée WIX. Aucun produit n'a été certifié ou garanti pour un usage aéronautique. Aucun produit n'a été certifié ou garanti pour la filtration de carburant ou d'huile dans des utilisations liées au chauffage.

This catalog and all information herein supersedes all previous filter catalogs and information.
Ce catalogue et tous les renseignements qu'il contient annulent et remplacent tous les précédents catalogues et la documentation sur les filtres.

ADVERTENCIA SOBRE CORRELACIONES

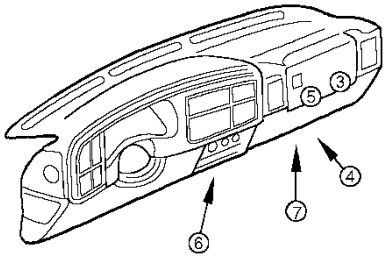

IMPORTANTE: Sólo para referencia. No existen garantías expresas o implícitas con respecto a los productos seleccionados por tamaño, característica o referencia cruzada inválida. Las garantías solamente aplican para los productos seleccionados de acuerdo con la lista de aplicaciones del vehículo. Para las aplicaciones que no figuran en la lista, la cobertura de la garantía requiere una referencia cruzada válida del OEM, tal como se describe en la Garantía Limitada WIX. Ningún producto ha sido certificado o garantizado para uso en aviación. Ningún producto ha sido certificado o garantizado para la filtración de combustible o aceite en aplicaciones de calefacción.

Este catálogo y toda la información aquí presentada, suplantan todos los catálogos y el material informativo previos sobre los filtros.

Les numéros de pièce en *italiques* peuvent ne pas être disponibles. Les filtres à huile XP Wix contiennent un matériau 100 % synthétique.

Helpful Hints For Transmission Filter Installation

1 NO SPECIAL TOOLS REQUIRED. These are the simple tools required to do most normal replacement: • Speed Wrench • ½" Socket • Screwdriver • 7/16" Open End Wrench. No mechanical or hydraulic components in the transmission are disturbed during the change. The filter is simply removed with a screwdriver in just a few seconds and replaced in the same short time.

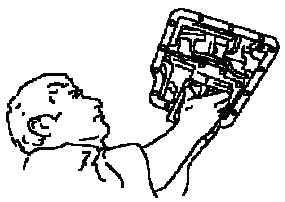

2 POSITION TRANSPAN, ®DRAIN FLUID, REMOVE BOLTS AND DROP PAN. Start removing bolts at one corner, alternating from side to side, allowing pan to gradually tilt downward in one direction for easy draining.

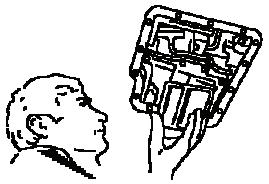

3 SCRAPE OFF OLD GASKET AND CLEAN PAN and case. Clean the pan inside and outside. Straighten pan around bolt holes.

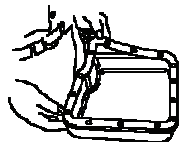

4 REMOVE OLD FILTER. The filters are either held in place with bolts, screws or simply slip in and out.

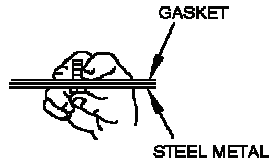

5 POSITION NEW FILTER AND REPLACE SCREWS. Everything you need to replace the filter is included in the filter kit, filter, pan gasket and "O" ring (when required).

6 INSTALL NEW GASKET. Unfold gasket and place on top of the clean and dry sheet metal surface. **DO NOT USE ADHESIVE-SEALANTS.**

Align the GRIPPER™ gasket with the sheet metal. Then pass the bolt through the sheet metal and continue to press the bolt through the gasket material which has slightly undersize bolt holes. This procedure will retain the gasket to the sheet metal pan. Repeat this procedure until all bolts are in position. Wipe excess oil from the transmission flange. Avoid oil accumulation on pan gasket at time of assembly. Place transmission pan gasket assembly in alignment with transmission and install bolts.

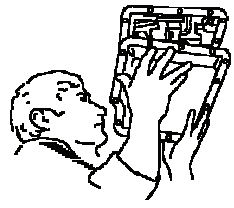

7 POSITION PAN TO CASE AND REPLACE BOLTS.

(A) Hand tighten or use power tools with proper torque setting capabilities.

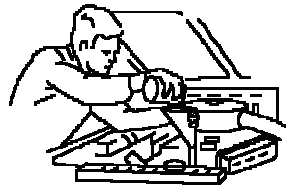

(B) Snug up bolts. Start in center of pan; then continue to the opposite side, criss-crossing and working towards outer end of pan.

(C) Tighten to 80 inch-pounds using the same sequence. (Based on 5/16-18 (NC) fastener)

(D) Then apply final torque of 120 inch-pounds, repeating the bolt tightening sequence.

8* REFILL TRANSMISSION. Lower car. Remove dipstick from oil filler tube, add transmission fluid as recommended by car manufacturer. Apply parking brakes, start engine in park, **DO NOT RACE ENGINE**. Move control lever through each range. Immediately check fluid level with selector lever in park, engine running and vehicle on level surface. Add additional fluid to bring level to ¼" below the "add" mark on dipstick.

NOTE: DO NOT OVERFILL

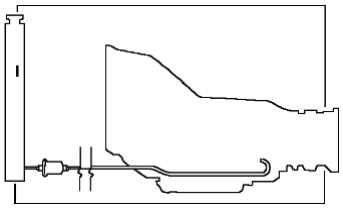

***USE PROPER FLUID-CHECK OWNER'S MANUAL**

Magnetic In-Line Transmission Filter
58953 (7/16") / 58964 (5/16")

The Auxiliary In-Line Filter from WIX is specifically designed to remove contaminants commonly found in automatic transmission fluid.

Contaminated transmission fluid can cause premature transmission failure. The WIX Magnetic In-Line Transmission Filter extracts both ferrous and non-ferrous particles from transmission fluid, providing low cost added protection of the hydraulic and lubrication systems.

The WIX Auxiliary Filter features double-action full-flow filtration. A powerful plastic magnet attracts and holds ferrous wear material suspended in the passing fluid flow. It works in tandem with a sturdy paper element, reinforced by a steel sleeve, which taps the remaining non-ferrous contaminants as small as 25 microns. If the paper element becomes clogged with contaminants, a pressure relief valve assures continuous fluid flow, while the magnet continues to filter metallic particles from the fluid.

The Auxiliary In-Line Filter is engineered to withstand the extreme conditions an automatic transmission may undergo.

This WIX filter is built to perform in the harshest environments. They perform in the desert heat, as well as the polar cold. They also withstand under constant pressures of as much as 200 psi, as well as the pressure surges that can dredge up contaminants. In addition, it's built to handle the sudden impacts and severe vibrations even normal driving conditions can provide.

58963 (7/16") / 58964 (5/16")

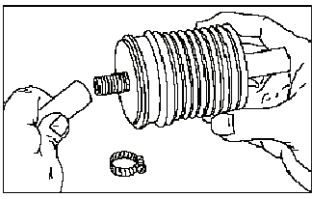

- **WIX In-Line Transmission Filter takes only minutes to install in the transmission cooling line.**

The In-line Auxiliary Transmission Filter Specially Designed For Today's Automatic Transmissions

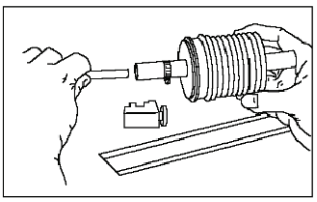

Efficient: In independent testing, this WIX magnetic in-line filter removed over 95% of all metallic impurities introduced into the transmission fluid.

Durable: It continues to filter out contaminants even under the harshest conditions. In temperatures up to 350°F, the in-line filter's rugged construction can withstand constant pressures as high as 200 psi and intermittent short surges of even higher pressure. It is also shock and vibration resistant.

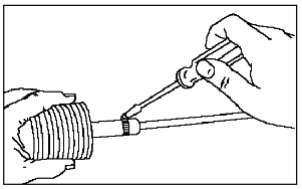

Easy to Install: The WIX magnetic in-line auxiliary transmission filter can be installed in less than ten minutes…. and replaced in less that five. Here's how:

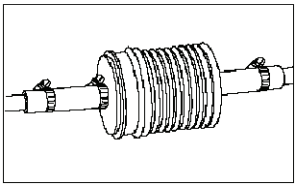

1. Insert short lengths of suitable hose onto filter couplings and firmly clamp.

2. Insert hose ends onto end of gap cut into cooling line, taking care to see that filter is properly oriented to fluid flow as indicated by flow arrow on filter.

3. Secure all clamps on the cooling line.

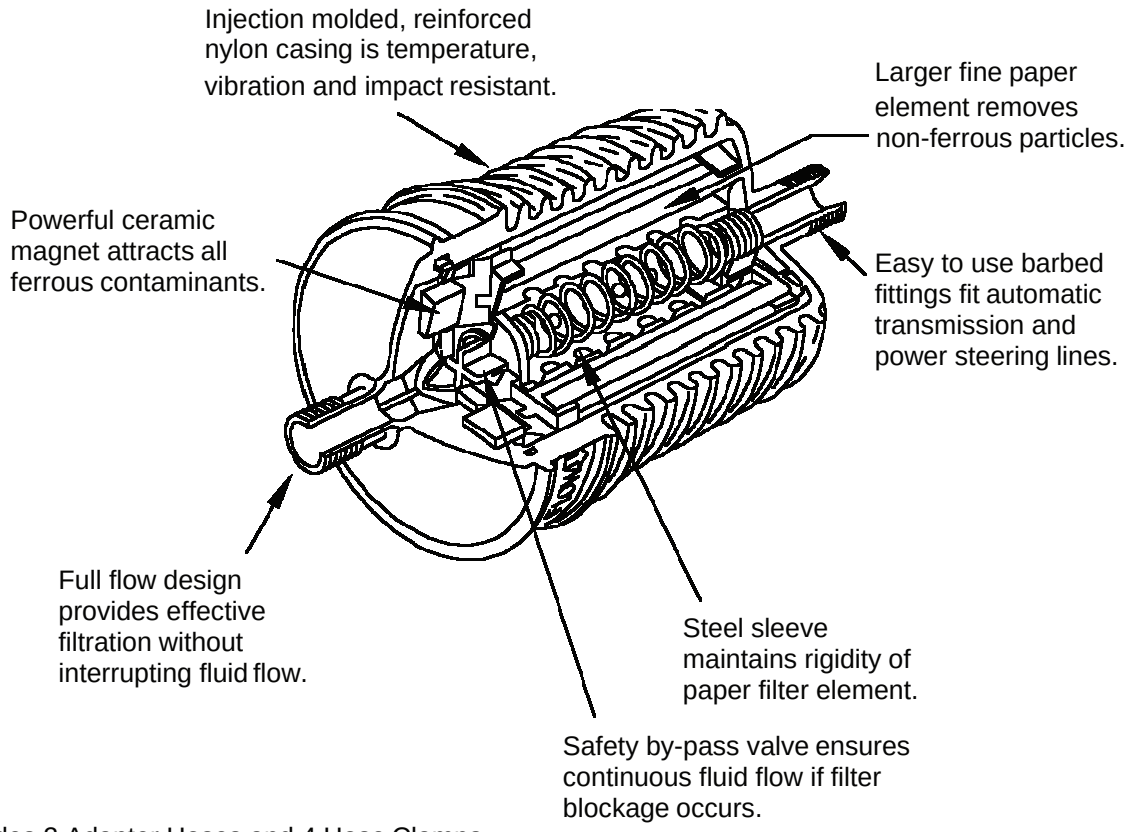

4. And you're finished.

It's the perfect preventive maintenance product, and it's from WIX.

Universal In-Line Transmission Filter
(Can Also Be Used On Power Steering)

Note: On vehicles which have not experienced transmission failures, install into the cooler inlet line to protect cooler and transmission from contaminants. After an overhaul, install into cooler return line to trap contaminants that may remain in the cooler.

Includes 2 Adapter Hoses and 4 Hose Clamps

Warning: When used on power steering, install only on return side (Low Pressure Side).

Conseils utiles pour l'installation du filtre a transmission

1 AUCUN OUTIL SPÉCIAL NÉCESSAIRE. Ces outils simples conviennent à la plupart des remplacements ordinaires: ¦ Clé à vilebrequin ¦ Douille de 1/2 po ¦ Tournevis ¦ Clé ouverte de 7/16 po. Aucunes composantes hydraulique ou mécanique sont perturbées dans la transmission lors du changement. Le filtre s'enlève simplement avec un tournevis en quelques secondes, et se remonte également en quelques instants.

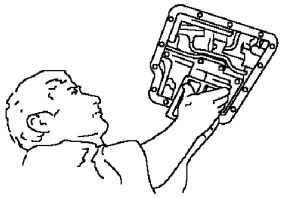

2 PLACEZ LE BAC DE VIDANGE, ET FAITES ÉCOULER L'HUILE, ENLEVEZ LES BOULONS ET ABAISSEZ LE CARTER. Enlevez les boulons en commençant par un coin, puis en allant d'un côté à l'autre, en laissant le carter s'incliner graduellement vers le bas et dans un sens pour faciliter la vidange.

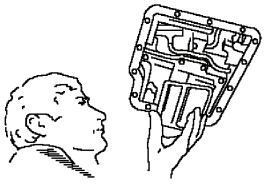

3 ENLEVEZ AVEC UN GRATTOIR LE VIEUX JOINT ET NETTOYEZ LE BAC ET LE CARTER. Nettoyez l'intérieur et l'extérieur du bac. Redressez le bac autour des trous à boulons.

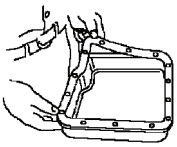

4 ENLEVEZ L'ANCIEN FILTRE. Les filtres sont maintenus en place soit avec des boulons, soit avec des vis, ou dans certains cas se glissent vers l'intérieur ou vers l'extérieur.

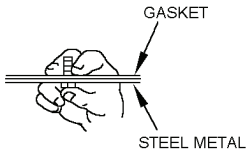

5 PLACEZ LE FILTRE NEUF ET REMETTEZ LES VIS. Tout ce dont vous avez besoin pour remonter les filtres est compris dans le nécessaire de filtre, filtre joint de carter et joint torique (si requis).

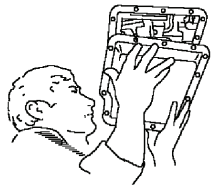

6 INSTALLEZ UN NOUVEAU JOINT ou un joint réutilisable et placez-le sur la surface sèche et propre d'une tôle. **NE PAS UTILISER DE SCELLANT ADHÉSIF.**
Alignez le joint plat avec la tôle. Placez ensuite les boulons dans la tôle et enfoncez-les dans le joint car les trous dans ce dernier sont légèrement plus petits. Ceci permet de faire retenir le joint au bac en tôle. Répétez cette opération jusqu'à ce que les boulons soient en position. Essuyez l'excès d'huile du rebord de la transmission. Évitez d'accumuler de l'huile sur le joint au moment de l'assemblage. Placez l'ensemble joint et carter en l'alignant avec la transmission et mettez les boulons.

7 PLACEZ LE BAC SUR LE CARTER ET REMETTEZ LES BOULONS.
(A) Serrez à la main ou utilisez des outils mécaniques réglés à un couple approprié.
(B) Serrez les boulons juste assez pour éliminer le jeu. Commencez au centre du carter; puis continuez au côte opposé, en passant d'un côté à l'autre et en se dirigeant vers les deux extrémités du carter.
(C) Resserrez ensuite les boulons dans le même ordre selon un couple de 80 po/lb. (D'après une fixation de 5/16 – 18 (nc).
(D) En dernier lieu, serrez au couple de 120 po/lb, en suivant encore une fois le même ordre.

8* REMPLISSEZ LA TRANSMISSION.
Abaissez l'automobile. Retirez la jauge du tube de remplissage de l'huile, ajoutez l'huile à transmission comme il est recommandé par le fabricant. Appliquez les freins de stationnement, démarrez le moteur, en position «park», **NE FAITES PAS EMBALLER LE MOTEUR.** Placez le levier de vitesse dans chacune des gammes. Vérifiez immédiatement le niveau de l'huile, le sélecteur étant en position «park», le moteur étant en marche et le véhicule se trouvant sur une surface plane. Ajoutez de l'huile supplémentaire pour amener le niveau à 1/4 po en dessous du repère «add» (ajouter) de la jauge.

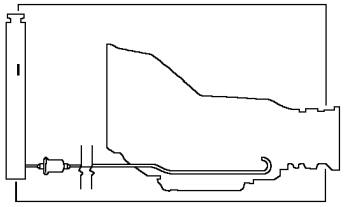

NOTE: NE PAS TROP REMPLIR.
***UTILISEZ LA BONNE HUILE – VÉRIFIEZ LE GUIDE DU PROPRIÉTAIRE POUR OBTENIR LE TYPE D'HUILE PRÉCIS.**

Filtre de conduite magnétique pour transmission 58953 (7/16 po)/58964 (5/16 po)

Le filtre de conduite auxiliaire WIX est conçu spécifiquement pour enlever les impuretés communément trouvées dans l'huile des transmissions automatiques.

L'huile contaminée des transmissions peut causer une panne prématurée dans la transmission. Le filtre de conduite magnétique WIX extrait les particules ferreuses et non-ferreuses de l'huile, offrant une protection supplémentaire abordable des systèmes hydrauliques et de lubrification.

Ce filtre auxiliaire WIX est caractérisé par une filtration plein débit à double action. Un aimant de plastique puissant attire et retient des matières d'usure ferreuses, suspendues dans l'huile en circulation. Il travaille de concert avec un élément en papier robuste, renforcé par un manchon d'acier qui capte les impuretés restantes non-ferreuses, même si elles sont de 25 microns seulement. Si l'élément de papier s'encrasse d'impuretés, une soupape de sûreté assure un débit continu de l'huile, alors que l'aimant continue de récupérer les particules métalliques.

Le filtre de conduite auxiliaire est étudié tel qu'il résiste aux conditions extrêmes des transmissions automatiques.

Le filtre de conduite magnétique WIX est construit afin de demeurer performant dans les milieux les plus difficiles; sous la chaleur du désert comme dans le froid polaire; sous une pression uniforme allant jusqu'à 200 lb/po² et sous des surpressions pouvant draguer les impuretés. Il est également fabriqué pour supporter les impacts soudains et les vibrations fortes qui surviennent même lors de la conduite normale.

58953 (7/16 po)/58964 (5/16 po)

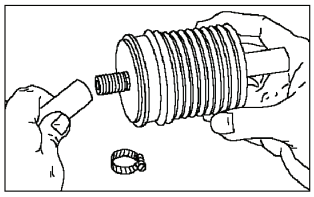

◆ Les filtres de conduite pour transmission WIX s'installent en quelques instants sur la canalisation de refroidissement de la transmission

Le filtre de conduite auxiliaire pour transmission conçu spécialement pour les transmissions automatiques d'aujourd'hui.

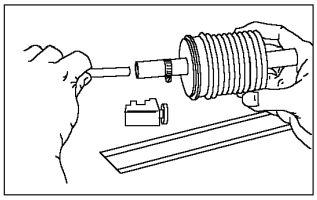

Efficace: Lors d'essai indépendant, le filtre de conduite magnétique WIX enleva plus de 95% de toutes les impuretés métalliques introduites dans l'huile de transmission.

Durable: Il continue d'enlever les impuretés même dans les conditions les plus difficiles, et pour des températures atteignant jusqu'à 350° F. Grâce à sa construction robuste, le filtre de conduite peut résister à des pressions continues pouvant atteindre jusqu'à 200 lb/po² ainsi qu'à des àcoups intermittents de pression encore plus élevée. Il est d'ailleurs résistant aux secousses et aux vibrations.

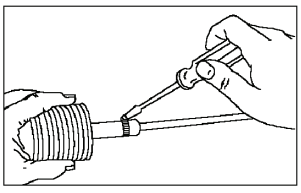

Facile à Installer: Le filtre de conduite auxiliaire magnétique WIX peut être installé en moins de dix minutes… et se remplace en moins de cinq. Voici

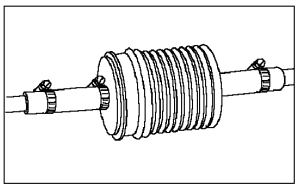

1. Introduisez des morceaux de tuyaux flexibles convenables aux raccords du filtre et fixez fermement.

2. Introduisez les extrémités des tuyaux aux deux bouts de la ligne de refroidissement une fois celle-ci coupée, en prenant soin de situer le filtre dans le sens du débit de l'huile comme il est indiqué par la flèche sur le filtre.

3. Fixez toutes les brides de serrage sur la ligne de refroidissement.

4. Et voilà, c'est terminé.

Un parfait produit d'entretien préventif de WIX.

Consejos útiles para la instalación de los filtros de la transmisión

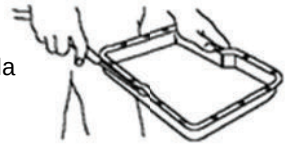

1 NO REQUIERE HERRAMIENTAS ESPECIALES. Estas son las herramientas simples requeridas para realizar la mayoría de los reemplazos comunes: ● Llave acodada ● Llave de tubo de ½" ● Destornillador ● Llave de boca fija abierta de 7/16". Ninguna pieza componente mecánica o hidráulica en la transmisión es perturbada durante el cambio. El filtro es simplemente quitado con un destornillador en sólo unos pocos segundos, y es reemplazado en el mismo tiempo breve.

2 POSICIONE LA BANDEJA DE LA TRANSMISIÓN, DRENE EL FLUIDO, QUITE LOS PERNOS Y DEJE CAER LA BANDEJA.

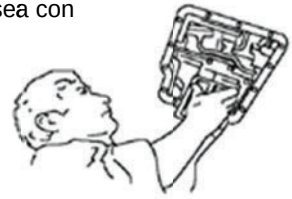

Comience a quitar los pernos en una esquina, alternando de un lado al otro, dejando que la bandeja se incline gradualmente hacia abajo en una dirección para facilitar el drenaje.

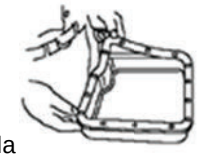

3 QUITE LA VIEJA JUNTA RASPÁNDOLA Y LIMPIE LA BANDEJA y la caja. Limpie la bandeja por dentro y por fuera. Enderece la bandeja alrededor de los agujeros de los pernos.

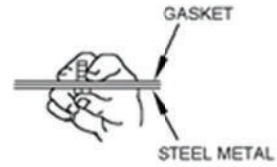

4 QUITE EL FILTRO VIEJO. Los filtros son soportados en su lugar ya sea con pernos o tornillos, o simplemente de deslizan hacia adentro y hacia afuera.

5 POSICIONE EL NUEVO FILTRO Y VUELVA A COLOCAR LOS TORNILLOS. Todo lo que usted necesita para reemplazar el filtro está incluido en el juego del filtro: filtro, junta de la bandeja y junta tórica (cuando es requerida).

6 INSTALE LA NUEVA JUNTA. Despliegue la junta y colóquela encima de la superficie de la lámina metálica limpia y seca. **NO USE SELLADORES ADHESIVOS.** Alinee la junta GRIPPERMC con la lámina metálica. Luego, pase el perno a través de dicha lámina y continúe presionando el perno a través del material de la junta que tiene agujeros apenas más pequeños para los pernos. Este procedimiento retendrá a la junta contra la bandeja metálica. Repita este procedimiento hasta que todos los pernos estén colocados. Limpie con un paño el exceso de aceite del reborde de la transmisión. Evite la acumulación de aceite sobre la junta de la bandeja en el momento del ensamblaje. Coloque la unidad de la junta de la bandeja de transmisión alineada con la caja de transmisión e instale los pernos.

GASKET = JUNTA STEEL METAL = LÁMINA DE ACERO

7 COLOQUE LA BANDEJA CONTRA LA CAJA Y VUELVA A COLOCAR LOS PERNOS.

(A) Ajuste a mano o use herramientas eléctricas con la capacidad de ajuste del torque apropiado.
(B) Ajuste los pernos. Comience en el centro de la bandeja; luego continúe en el lado opuesto, cruzando y trabajando hacia el extremo exterior de la bandeja.
(C) Ajuste hasta 9 N.m (80 pulg-libra) usando la misma secuencia (basado en un ajustador (NC) 5/16-18)
(D) Luego aplique un torque final de 13,5 N.m (120 pulg-libra), repitiendo la secuencia de ajuste de los pernos.

8* RELLENE LA TRANSMISIÓN. Baje el vehículo. Quite la varilla medidora del aceite del tubo de llenado del mismo, agregue fluido para transmisión tal como lo recomienda el fabricante del vehículo. Emplee el freno de mano, arranque el motor con el vehículo detenido, NO ACELERE EL MOTOR. Mueva la palanca de control por cada posición. Examine inmediatamente el nivel del fluido con la palanca en la selección "park" (detenido), el motor en marcha y el vehículo sobre una superficie nivelada. Agregue fluido adicional para llevar el nivel a 6,35 mm (1/4") por debajo de la marca "add" (agregar) en la varilla medidora.

NOTA: NO LLENE EN EXCESO.

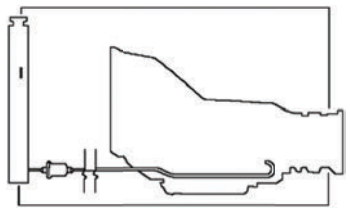

***USE EL MANUAL DEL DUEÑO PARA EXAMINAR CORRECTAMENTE EL FLUIDO.**

Filtro de la transmisión en línea magnético
58953 11,11 mm (7/16”) / 58964 7,93 mm (5/16”)

El filtro en línea auxiliar de WIX está específicamente diseñado para eliminar contaminantes comúnmente hallados en los fluidos de la transmisión automática.

El fluido de la transmisión contaminado puede causar fallas prematuras en la transmisión. El filtro de la transmisión en línea magnético WIX extrae tanto partículas ferrosas como no ferrosas del fluido de la transmisión, brindando protección adicional a los sistemas hidráulico y de lubricación, a bajo costo.

El filtro auxiliar WIX presenta una filtración de doble acción y flujo total. Un imán plástico potente atrae y contiene material de desgaste ferroso suspendido en el flujo de fluido que pasa. Funciona conjuntamente con un elemento de papel firme, reforzado por una manga de acero que atrapa los contaminantes no ferrosos remanentes tan pequeños como de 25 micrones. Si el elemento de papel se atasca con contaminantes, una válvula de alivio de presión asegura un flujo de fluido continuo, mientras el imán continúa filtrando las partículas metálicas del fluido.

El filtro en línea auxiliar está fabricado para soportar las condiciones extremas a las que una transmisión automática pueda estar sometida.

Este filtro WIX está fabricado para rendir en los ambientes más rigurosos. Realizan su función en el calor del desierto tan bien como en el frío polar. También soportan presiones constantes de hasta 1378,9 kPa (200 psi), así como los aumentos súbitos de presión que pueden dragar contaminantes. Además, está fabricado para controlar los impactos repentinos y las vibraciones severas que hasta las condiciones normales de manejo pueden proporcionar.

58963 11,11 mm (7/16”) / 58964 7,93 mm (5/16”)

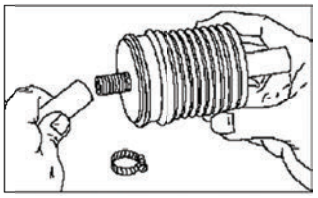

- **El filtro de la transmisión en línea WIX requiere solamente unos minutos para ser colocado en la línea de refrigeración de la transmisión.**

El filtro de la transmisión auxiliar en línea está especialmente diseñado para las transmisiones automáticas actuales.

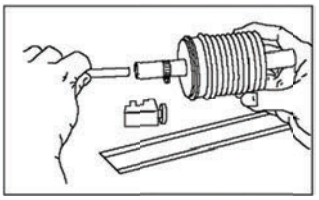

Eficiente: En pruebas independientes, este filtro en línea magnético WIX eliminó más de un 95% de todas las impurezas metálicas introducidas en el fluido de la transmisión.

Durable: Continúa filtrando contaminantes hasta bajo las condiciones más rigurosas. En temperaturas de hasta 176ºC (350°F), la construcción resistente del filtro en línea puede soportar presiones constantes de hasta 1378,9 kPa (200 psi) y aumentos súbitos, intermitentes y cortos, de presión aún más alta. También es resistente a los impactos y a las vibraciones.

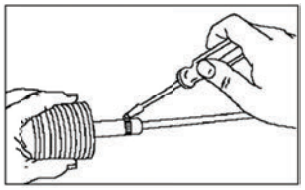

Fácil de instalar: El filtro de transmisión auxiliar en línea magnético WIX puede ser instalado en menos de diez minutos ... y reemplazado en menos de cinco. Aquí le mostramos cómo hacerlo:

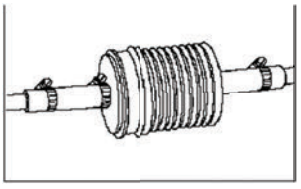

1. Inserte longitudes cortas de manguera apropiada sobre los acoplamientos del filtro y abrace firmemente.

2. Inserte los extremos de manguera sobre el extremo del hueco cortado dentro de la línea de refrigeración cuidando ver que el filtro esté correctamente orientado con el flujo del fluido, tal como lo indica la flecha de flujo sobre el filtro.

3. Asegure todas las abrazaderas sobre la línea de refrigeración.

4. Y ... usted ya terminó.

Es el producto de mantenimiento preventivo perfecto, y está fabricado por WIX.

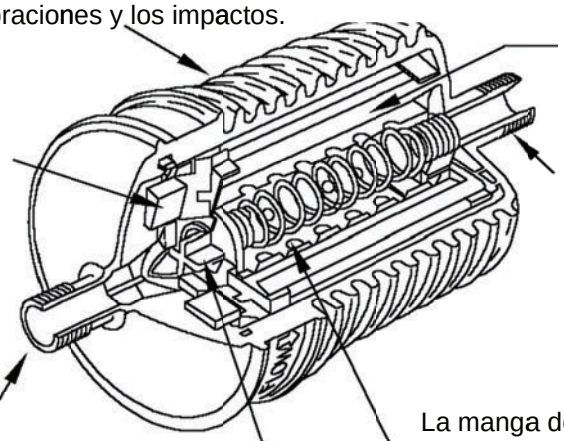

Filtro de la transmisión en línea universal
(Puede ser usado también en la transmisión asistida.)

Nota: En vehículos que no hayan experimentado fallas en la transmisión, instale dentro de la línea de entrada del refrigerador para proteger el refrigerador y la transmisión contra los contaminantes. Después de una puesta a punto, instale dentro de la línea de retorno del refrigerador para atrapar contaminantes que puedan permanecer en dicho refrigerador.

La caja de nylon reforzado moldeada por inyección es resistente a la temperatura, las vibraciones y los impactos.

El elemento de papel fino, más grande, elimina partículas no ferrosas.

El imán cerámico potente atrae todos los contaminantes ferrosos.

Accesorios acanalados fáciles para usar, aptos para líneas de transmisión automática y dirección asistida.

El diseño de flujo total proporciona filtración efectiva sin interrumpir el flujo del fluido.

La manga de acero mantiene la rigidez del elemento filtrante de papel.

Incluye 2 mangueras adaptadoras y 4 abrazaderas para mangueras.

La válvula de derivación de seguridad asegura un flujo de fluido continuo si se atasca el filtro.

Advertencia: Cuando es usado en dirección asistida, instale solamente en el lado de retorno (lado de presión baja).

WIX Racing Oil Filters

WIX provides two very different and distinct racing filters – **Advanced Performance Filters (T-10)** and **High Efficiency Endurance Filters (T-71)**.

Advanced Performance Oil Filters use a media (T-10) that is rated at a Frazier air flow of approximately 267 CFM and is wire-backed. The unique wire-backing provides a very stable base for a media blend of fiberglass, polyester and cellulose. This media is resistant to high temperatures and water levels in the oil that can plug standard media types. Our **Advanced Performance media (T-10)** is designed to provide a positive oil flow with low restriction *(see chart, next page)*.

WIX Advanced Performance (T-10) Oil Filter Part Numbers are:

51268 57003R* 57007R

Remote Mount Adapters Are Required (see pages 7 & 9).

Additional Oil Filter Features Include:

A. Heavy-walled can and cover to withstand the extreme burst pressures (up to 500 psi).

B. High temperature nitrile components (up to 300°F)…Anti-drainback valve (when included) and base plate gaskets to withstand extremely high racing temperatures.

C. Zinc chromate plated base plate…Low surface friction and corrosion-free.

D. Spiral wound center tube provides increased collapse pressure and enhanced flow pattern.

E. Metal end caps provide element strength and prevent filtering bypass.

F. Individually sealed to protect against contamination by environmental dust or dirt.

These are the WIX recommended oil filters for maximum horsepower increase, to be used primarily on concrete or asphalt tracks.

For optimum performance, use our Advanced Performance Oil Filters with our Advanced Performance Air Filters.

WIX Racing Oil Filters

High Efficiency Endurance Oil Filters use a media **(T-71**) rated at a Frazier air flow of approximately 75 CFR. This media contains a higher resin content than our **Advanced Performance Filters** to trap and hold smaller contaminants and provide higher efficiency.

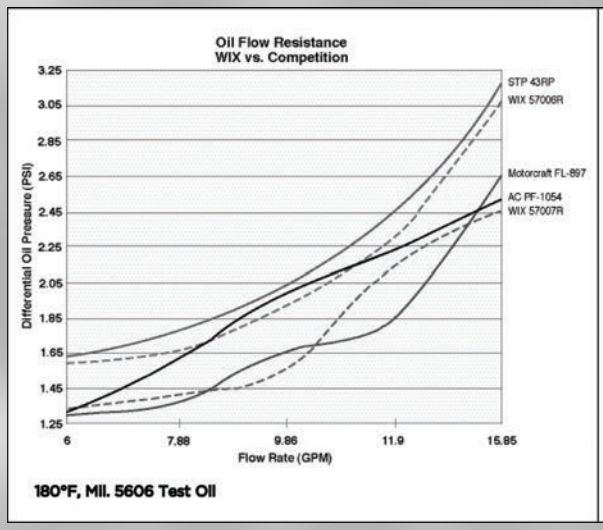

Our **High Efficiency Endurance Filters** also include the same component features as the **Advanced Performance Filters**: high burst pressure can, high temperature rubber components, zinc chromate base plate, metal end caps and spiral center tubes.

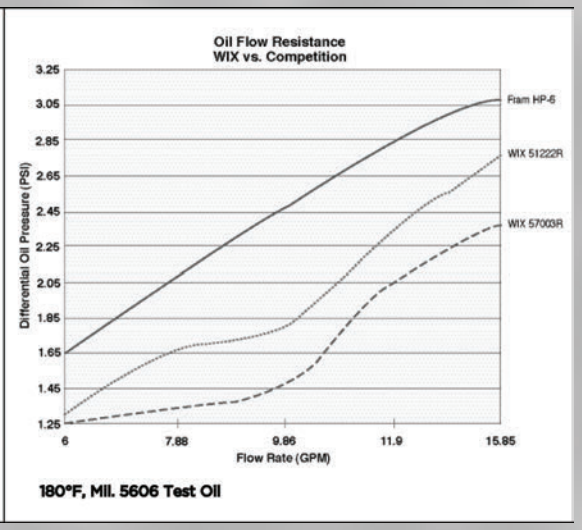

WIX High Efficiency Endurance (T-71) Oil Filter Part Numbers are:

51060R 51061R 51069R 51222R 51515R 51794R

These are the WIX recommended oil filters for better efficiency needed on dirt, clay or off-road tracks.

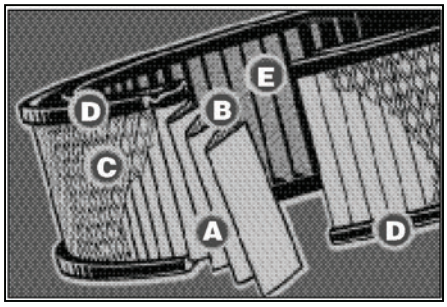

For better protection, use our High Efficiency Endurance Oil Filters with our High Efficiency Endurance Air Filters.

CAUTION: Not intended for street use.

WIX Racing Air Filters

Advanced Performance Air Filters use a unique patent-pending design. Our wire-backed gauze **Reemay**® media **(T-66)** allows maximum air flow while minimizing restriction to boost horsepower. With a Frazier air flow of approximately 410 CFM, these air filters have the lowest restriction of any racing filter available *(see chart, next page)*.

WIX Advanced Performance (T-66) Air Filter Part Numbers are:

46940R	**46944R**	**46945R**	**46948R**	**46949R**
46941R	**46928R**	**46974R**	**46927R**	**46926R**

Additional Air Filter Features Include:

A. High performance media is designed to provide increased air flow.

B. Wire mesh gauze media support (when included) contributes to rigid filter construction by assuring consistently stable pleats at high air flow volumes.

C. Outer screen of expanded metal protects the filter media and supports the filter assembly.

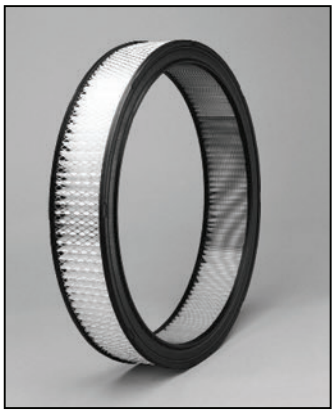

D. Molded plastisol top and bottom assures a positive seal between the filter and the air intake housing.

E. Inner screen of epoxy-coated steel wire withstands corrosion and insures stability of the filter element.

These are the WIX recommended air filters for *maximum horsepower increase* used primarily on concrete or asphalt tracks of Nextel Cup, Busch, SuperTruck or ARCA.

For optimum performance, use our Advanced Performance Air Filters with our Advanced Performance Oil Filters.

WIX Racing Air Filters

High Efficiency Endurance Air Filters use a media **(T-88)** specifically developed to filter out harmful contaminants while providing low restriction. With a Frazier air flow of approximately 73 CFM, this is an ideal air filter for the Late Model, Sportsman and Modified racers who run primarily on dirt tracks.

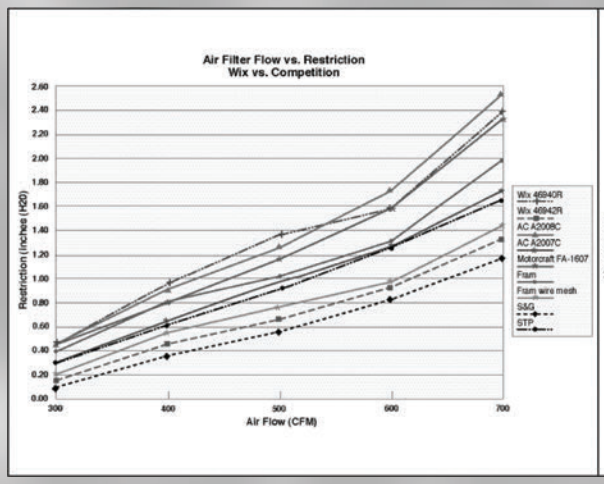

Our **High Efficiency Endurance Air Filters** also share the same exclusive component features as the **Advanced Performance Air Filters**.

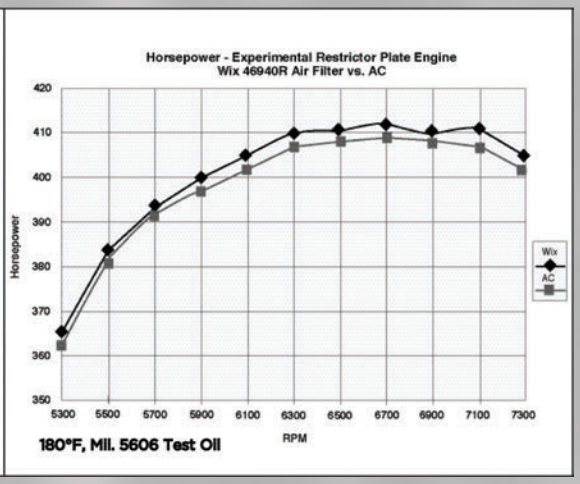

WIX High Efficiency Endurance (T-88) Air Filter Part Numbers are:

42095R 42096R 46946R

These are the WIX recommended air filters for better efficiency needed on dirt, clay or off-road tracks.

For better protection, use our High Efficiency Endurance Air Filters with our High Efficiency Endurance Oil Filters.

CAUTION: Not intended for street use.

WIX Racing Oil and Air Filter Specifications

Oil Filters

Filter Number	Thread Size	Filter Height	Filter OD	Media Type	Flow Rate GPM	Bypass Valve Setting*	Anit-Drain Back Valve
51060R	13/16-16	5.17	3.6	T-71	28	None	Yes
51061R	13/16-16	5.17	3.6	T-71	28	None	No

CAUTION: Racing performance parts are sold "as is" without any warranty. There is not implied warranty for fitness or merchantability. The buyer assumes all risks related to the use of this product. New vehicle and equipment warranties are voided when this product is used in competitive racing or modified high performance engines.

Filtres à huile Racing WIX

WIX propose deux types de filtres différents et distincts à utiliser pour les compétitions : les **filtres à performances élevées (T-10)** et les filtres **d'endurance à haute efficacité (T-71)**.

Les f**iltres à huile à performances élevées** utilisent un matériau (T-10) procurant un débit d'air de Frazier d'environ 7,56 m^3/min (267 pi^3/min) et possèdent un renfort arrière métallique. Ce renfort unique fournit une base très stable pour le matériau qui est un mélange de fibre de verre, de polyester et de cellulose. Ce matériau résiste aux hautes températures et aux grandes quantités d'eau dans l'huile qui peuvent colmater les matériaux ordinaires. Le **matériau à performances élevées (T-10)** de notre filtre est conçu pour fournir un bon débit d'huile tout en limitant le colmatage (voir le tableau de la page suivante).

Numéros de pièce des filtres à huile à performances élevées (T-10)

51268 57003R* 57007R

**** Nécessite un adaptateur de montage à distance (voir pages 7 et 9).***

Autres caractéristiques des filtres à huile

A. Boîtier et couvercle à paroi épaisse pour résister aux fortes pressions d'éclatement, jusqu'à 3 450 kPa (500 lb/po2).
B. Pièces en nitrile hautes températures, jusqu'à 148 ^oC (300 ^oF) : joints de soupape antirefoulement (le cas échéant) et de plaque de base résistant aux hautes températures se produisant lors des compétitions.
C. Plaque de base galvanisée au chromate de zinc : peu de frottement superficiel et anticorrosion.
D. Tube central en spirale pour augmenter la pression d'écrasement et le débit.
E. Capuchons en métal pour renforcer la cartouche et éviter toute dérivation de la filtration.
F. Joint hermétique individuel pour éviter la contamination due à la poussière ou à la saleté du milieu environnant.

Ce sont les filtres à huile recommandés par WIX pour obtenir le maximum de puissance, en particulier sur les pistes en béton ou asphaltées.

Pour obtenir des performances optimales, utilisez nos filtres à huile à performances élevées avec nos filtres à air à performances élevées.

Filtres à huile Racing WIX

Les **filtres à huile d'endurance à haute efficacité** utilisent un matériau **(T-71)** procurant un débit d'air de Frazier d'environ 2,12 m^3/min (75 pi^3/min). Ce matériau contient une teneur en résine plus élevée que celle de nos **filtres à performances élevées** pour mieux capturer et retenir les plus petites impuretés tout en étant plus efficaces.

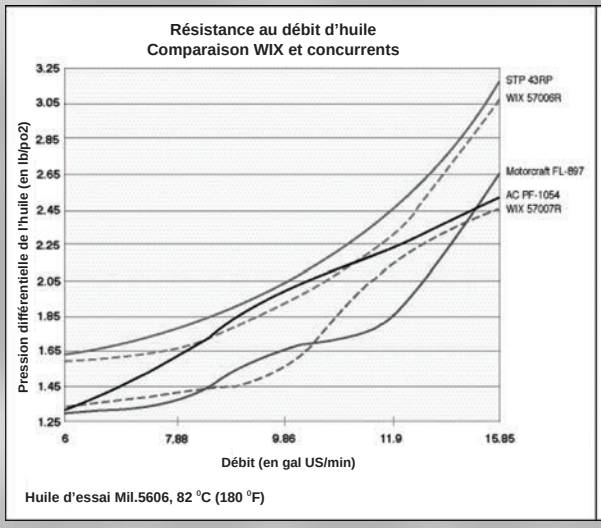

Nos f**iltres d'endurance à haute efficacité** possèdent des pièces de mêmes caractéristiques que celles des **filtres à performances élevées** : boîtier à haute résistance contre l'éclatement, pièces en caoutchouc hautes températures, plaque de base au chromate de zinc, capuchons en métal et tubes centraux en spirale.

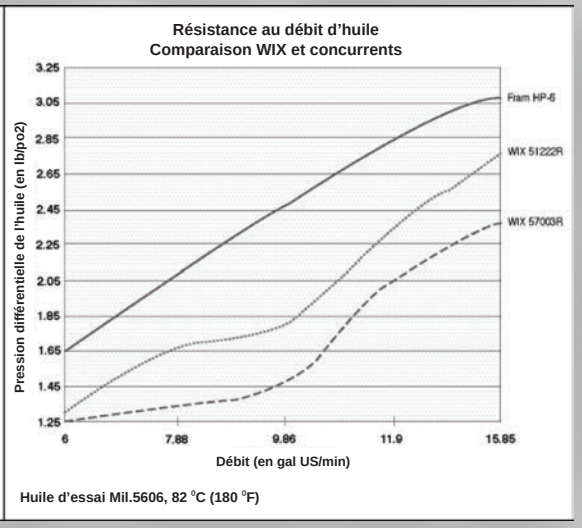

Numéros de pièce des filtres à huile d'endurance à haute efficacité (T-71) WIX

51060R **51061R** **51069R** **51222R** **51515R** **51794R**

Ce sont les filtres à huile recommandés par WIX pour améliorer l'efficacité requise sur les pistes cendrées, en terre battue ou en tous terrains.

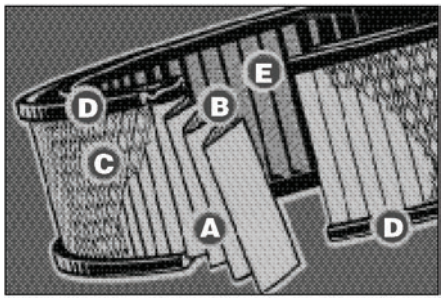

Pour améliorer la protection, utilisez nos filtres à huile d'endurance à haute efficacité avec nos filtres à air d'endurance à haute efficacité.

MISE EN GARDE : Pas pour la conduite en ville.

Filtres à air Racing WIX

Les **filtres à air à performances élevées** utilisent une conception unique, à brevet en instance. Notre matériau **Reemay**[MD] en gaze à renfort arrière métallique **(T-66)** permet un débit d'air maximal tout en minimisant le colmatage afin de renforcer la puissance. Avec un débit d'air de Frazier d'environ 11,6 m^3/min (410 pi^3/min), ces filtres à air ont le degré de colmatage le plus faible de tous les filtres pour compétitions concurrents (voir le tableau de la page suivante).

Numéros de pièce des filtres à air à performances élevées (T-66) WIX

46940R	**46944R**	**46945R**	**46948R**	**46949R**
46941R	**46928R**	**46974R**	**46927R**	**46926R**

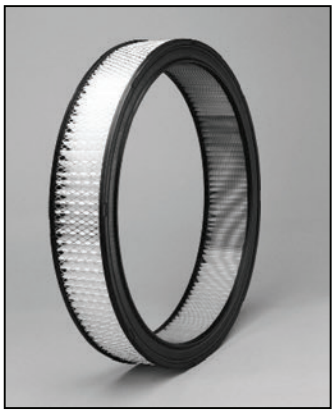

Autres caractéristiques des filtres à air

A. Le matériau hautes performances est conçu pour obtenir un meilleur débit d'air.
B. Le support de matériau en gaze à maille en métal (le cas échéant) contribue à renforcer le filtre en garantissant des plis restant toujours stables même à grand débit d'air.
C. Le tamis extérieur en métal déployé protège le matériau du filtre et soutient le filtre.
D. Les parties supérieure et inférieure en plastisol moulé garantissent un joint hermétique entre le filtre et le boîtier d'admission d'air.
E. Le tamis intérieur en acier enduit d'époxyde résiste à la corrosion et garantit une bonne stabilité de la cartouche du filtre.

Ce sont les filtres à air recommandés par WIX pour augmenter au maximum la puissance sur les pistes en béton ou asphaltées de Nextel Cup, Busch, Super Truck ou ARCA.

Pour obtenir des performances optimales, utilisez nos filtres à air à performances élevées avec nos filtres à huile à performances élevées.

Filtres à air Racing WIX

Les **filtres à air d'endurance à haute efficacité** utilisent un matériau **(T-88)** spécialement conçu pour filtrer les impuretés dangereuses tout en procurant un colmatage faible. Avec un débit d'air de Frazier d'environ 2,07 m^3/min (73 pi^3/min), c'est le filtre à air idéal pour les véhicules de course derniers modèles, sports et modifiés utilisés principalement sur les pistes en terre battue.

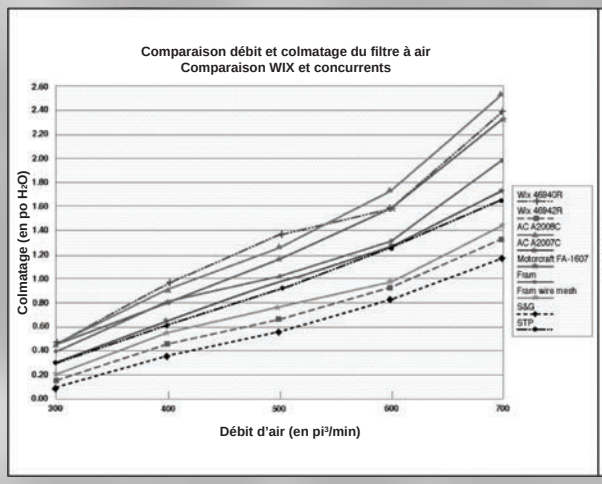

Nos **filtres à air d'endurance à haute efficacité** possèdent les mêmes caractéristiques exclusives que les **filtres à air à performances élevées.**

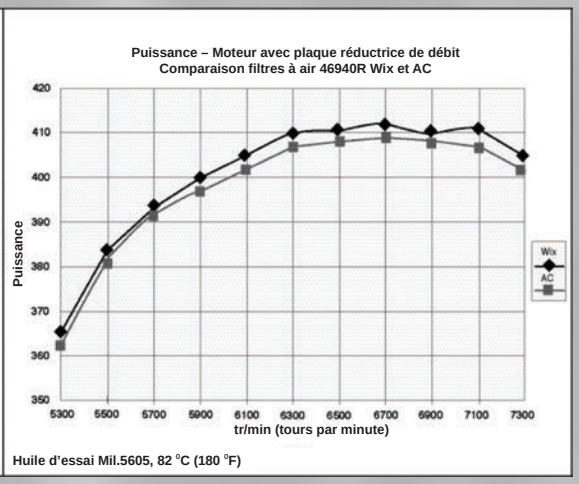

Numéros de pièce des filtres à air d'endurance à haute efficacité (T-88) WIX

42095R 42096R 46946R

Ce sont les filtres à air recommandés par WIX pour améliorer l'efficacité requise sur les pistes cendrées, en terre battue ou en tous terrains.

Pour améliorer la protection, utilisez nos filtres à air d'endurance à haute efficacité avec nos filtres à huile d'endurance à haute efficacité.

MISE EN GARDE : Pas pour la conduite en ville.

Caractéristiques des filtres à huile et à air Racing WIX

Filtres à huile

Numéro du filtre	Diamètre du filetage	Hauteur du filtre	Diamètre extérieur du filtre	Type de matériau	Débit (en gal US/min)	Réglage de la soupape de dérivation*	Soupape antirefoule-ment
51060R	13/16-16	5.17	3.6	T-71	28	Aucune	Oui

Les garanties des véhicules et des matériels neufs sont annulées lorsque ce produit est utilisé dans des moteurs de voitures de course ou hautes performances modifiés.

Filtros de aceite Racing WIX

WIX proporciona dos filtros muy diferentes y definidos para uso en competencias – **Filtros de rendimiento avanzado (T 10) y Filtros de alta eficiencia y resistencia (T 71).**

Los f**iltros de aceite de rendimiento avanzado** usan un medio (T 10) que está clasificado con una eficiencia de flujo de aire Frazier de aproximadamente 7,56 m^3/min (267 $pies^3$/min) y que tiene un refuerzo posterior de alambre. El refuerzo de alambre excepcional proporciona una base muy estable para una mezcla de medio de fibra de vidrio, poliéster y celulosa. Este medio es resistente a altas temperaturas y altos niveles de agua en el aceite que pueden taponar tipos comunes de medios. Nuestro **medio de rendimiento avanzado (T 10)** está diseñado para proporcionar un flujo positivo de aceite con baja restricción (ver la tabla en la página siguiente).

Los números de pieza de los filtros de aceite de rendimiento avanzado (T 10) WIX son:

51268 57003R* 57007R

**** Requieren adaptadores de montajes remotos (ver las páginas 7 y 9).***

Las características adicionales del filtro de aceite incluyen:

A. Lata con paredes altas y cubierta para resistir presiones extremas de rotura (hasta 3447 kPa ó 500 psi).

B. Componentes de nitrilo para alta temperatura (hasta 148°C ó 300°F) ... Válvula antidrenaje (cuando se incluye) y juntas de placa de base para resistir temperatu ras de competencia extremadamente altas.

C. Placa de base galvanizada con cromato de zinc ... Baja fricción superficial y libre de corrosiones.

D. Tubo central espiralado para proporcionar mayor presión de colapso y tipo de flujo mejorado.

E. Tapas de extremo metálicas para proporcionar resistencia en el elemento y evitar desviación de la filtración.

F. Sellado individualmente para proteger contra la contaminación de polvo o sucie dad del medio ambiente.

Estos son los filtros de aceite recomendados por WIX para aumento máximo de potencia, para ser usados principalmente sobre caminos de cemento o asfalto.

Para un rendimiento óptimo, use nuestros filtros de aceite de rendimiento avanzado con nuestros filtros de aire de rendimiento avanzado.

Filtros de aceite Racing WIX

Los **filtros de aceite de alta eficiencia y resistencia** usan un medio **(T 71)** que está clasificado con una eficiencia de flujo de aire Frazier de aproximadamente 2,12 m^3/min (75 $pies^3$/min). Este medio tiene un contenido de resina más alto que nuestros **filtros de rendimiento avanzado** para atrapar y contener contaminantes más pequeños y proporcionar una mayor eficiencia.

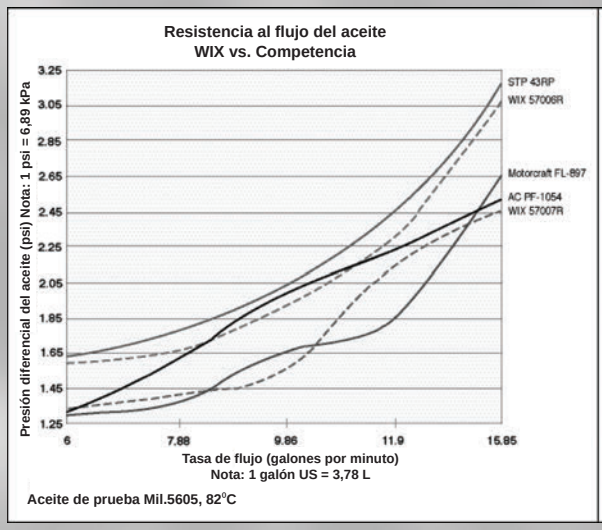

Nuestros **filtros de alta eficiencia y resistencia** también incluyen las mismas características de sus componentes que los **filtros de rendimiento avanzado**: lata resistente a alta presión de rotura, componentes de goma para altas temperaturas, placa de base con cromato de zinc, tapas de extremo metálicas y tubos centrales espiralados.

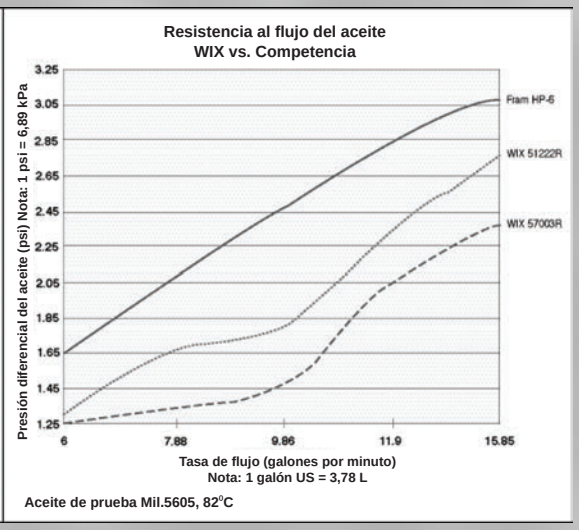

Los números de pieza de los filtros de aceite de alta eficiencia y resistencia (T 71) WIX son:

51060R	**51061R**	**51069R**	**51222R**	**51515R**	**51794R**

Estos son los filtros de aceite recomendados por WIX para una mejor eficiencia requerida en caminos de tierra, arcilla o no pavimentados.

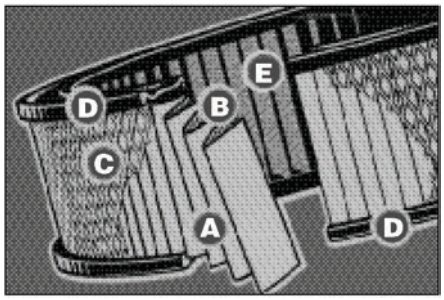

Para mejor protección, use nuestros filtros de aceite de alta eficiencia y resistencia con nuestros filtros de aire de alta eficiencia y resistencia.

Advertencia: No apto para uso en la calle.

Filtros de aire Racing WIX

Los **filtros de aire de rendimiento avanzado** usan un diseño único con patente en trámite. Nuestro medio **(T 66)** de gasa con refuerzo posterior de alambre **Reemay**[MR] permite un flujo de aire máximo mientras minimiza la restricción para incrementar la potencia. Con una eficiencia de flujo de aire Frazier de aproximadamente 11,6 m^3/min (410 $pies^3$/min), estos filtros de aire tienen la restricción más baja de todos los filtros para competencias disponibles (ver la tabla en la página siguiente).

Los números de pieza de los filtros de aire de rendimiento avanzado (T 66) WIX son:

46940R	**46944R**	**46945R**	**46948R**	**46949R**
46941R	**46928R**	**46974R**	**46927R**	**46926R**

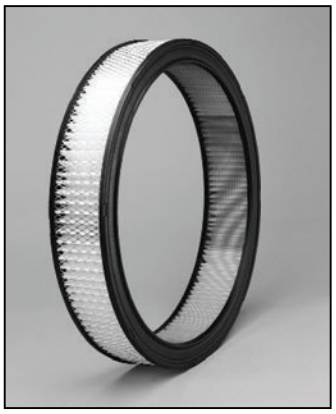

Las características adicionales del filtro de aire incluyen:

A. El medio de alto rendimiento está diseñado para proporcionar un mayor flujo de aire.
B. El soporte de malla de alambre en el medio de gasa (cuando se incluye) contribuye a la construcción rígida del filtro, asegurando pliegues consistente mente estables con altos volúmenes de flujo de aire.
C. El tamiz exterior de metal expandido protege al medio del filtro y soporta la unidad del filtro.
D. Las partes superior e inferior en plastisol moldeado aseguran un sellado positivo entre el filtro y la caja de la toma de aire.
E. El tamiz interior de alambre de acero recubierto con resina epoxi resiste la corrosión y asegura la estabilidad del elemento filtrante.

Estos son los filtros de aire recomendados por WIX para un aumento máximo de poten cia, usados principalmente en caminos de cemento o asfalto de Nextel Cup, Busch, Super Truck o ARCA.

Para un rendimiento óptimo, use nuestros filtros de aire de rendimiento avanzado con nuestros filtros de aceite de rendimiento avanzado.

Filtros de aire Racing WIX

Los **filtros de aire de alta eficiencia y resistencia** usan un medio **(T 88)** específicamente desarrollado para filtrar los contaminantes nocivos mientras proporciona una baja restricción. Con una eficiencia de flujo de aire Frazier de aproximadamente 2,067 m^3/min (73 $pies^3$/min), este filtro de aire es ideal para vehículos para competencias Late Model, Sportsman y Modified que corren principalmente sobre caminos de tierra.

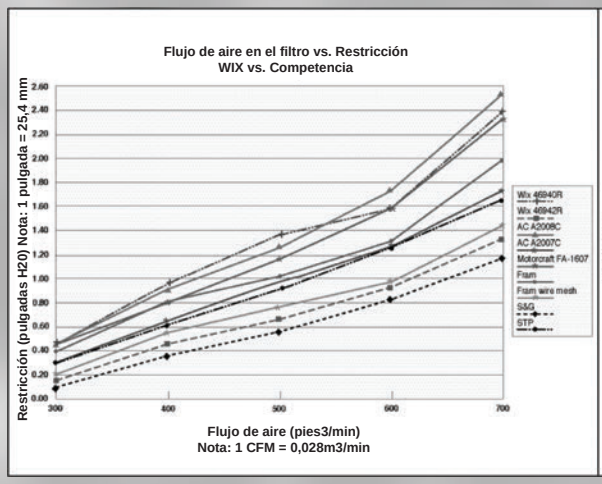

Nuestros **filtros de aire de alta eficiencia y resistencia** también poseen las mismas características de sus componentes que los **filtros de aire de rendimiento avanzado.**

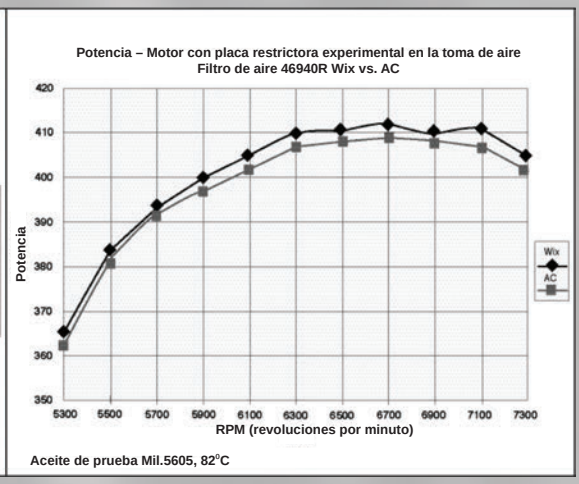

Los números de pieza de los filtros de aire de alta eficiencia y resistencia (T 88) WIX son:

42095R 42096R 46946R

Estos son los filtros de aire recomendados por WIX para una mejor eficiencia requerida en caminos de tierra, arcilla o no pavimentados.

Para mejor protección, use nuestros filtros de aire de alta eficiencia y resistencia con nuestros filtros de aceite de alta eficiencia y resistencia.

Advertencia: No apto para uso en la calle.

Especificaciones de los filtros de aceite y de aire Racing WIX

Filtros de aceite

Número del filtro	Medida de la rosca	Altura del filtro	Diámetro exterior del filtro	Tipo de medio	Tasa de flujo (galones por minuto)	Ajuste de la válvula de derivación*	Válvula antidrenaje

ATENCIÓN: Las piezas con rendimiento para competencias son vendidas “como están” (en su condición existente) sin ninguna garantía. No hay ninguna garantía implícita de aptitud o comerciabilidad. El comprador asume todos los riesgos relacionados con el uso de este producto. Las garantías sobre nuevos vehículos y equipos quedan anuladas cuando este producto es usado en carreras competitivas o en motores modificados para alto rendimiento.

Over Pressurized Lube Oil Filters

From time to time every filter manufacturer has had a filter that has been severely over pressurized returned from a customer. Often the deformed filter is the only sign the car owner has that a problem existed in their lube oil system.

It's possible that the damaged filter was not noticed until it was removed during the next scheduled oil change. However, if the pressure was sufficient to blow out the gasket or unroll the lockseam, the car owner may have experienced immediate and costly problems.

With the "evidence" in their hands, they tend to put the blame on the damaged filter. It's not surprising that they are more than a little aggravated when the filter manufacturer denies any responsibility for the damage. What, then, has caused the over pressurization?

A look at how a lube oil system functions will show that oil pressure is created by the oil pump. The upper limit of this pressure is controlled by a pressure regulating valve which is usually an integral part of the pump. Figure 1 is a simplified diagram of the lube oil system showing the pump, regulating valve, filter and bearings.

The pump supplies sufficient flow to lubricate the bearings and other moving parts of the engine. This oil must be under pressure if it is to properly separate the highly loaded parts of an engine and prevent excessive wear. The purpose of the regulating valve is to provide this pressure which on most passenger cars is between 40 PSI (280 kPa) and 60 PSI (410 kPa).

The regulating valve is made up of a ball or plunger which regulates pressure with the aid of a spring. The spring is calibrated so that the plunger will lift off its seat when the oil pressure reaches the desired amount. Once the valve is open, the pressure remains fairly constant with only small changes occurring as the engine speed varies.

The filter and all other components in the lube system are subjected to the pressure established by the regulating valve. If this pressure is excessive, filter damage may occur. This is the point that many people who are not familiar with lube systems fail to realize.

What can cause the pressure in the system to exceed the regulating valve setting? The answer is that either the valve must be stuck in the closed position or it is sluggish and slow to move to the open position after the engine has started.

Over Pressurized Lube Oil Filters

Normal operating pressure causes no permanent deformation of the filter body. When the system pressure reaches 150 PSI (1,000 kPa) due to a faulty regulating valve, most filters become permanently deformed. At this pressure the gasket usually will not blow out and the lockseam will remain sound.

If the regulating valve still remains stuck, the pressure will increase further and the gasket between the filter and the base can be blown out. This will probably cause the loss of all the oil in the system. If the filter has been installed on the tight side, the gasket may not blow out and the lockseam will unwind as the pressure continues to rise. The main point is that the deformed filter is not the cause of this excessive pressure, but is the victim of a faulty regulating valve.

If the customer is alert and shuts the engine off at the first sign of trouble (red light on or reduced oil pressure) they can limit their loss to a tow job, oil change, new filter and oil pressure regulating valve inspection. If the vehicle continues to be driven, engine failure is probable.

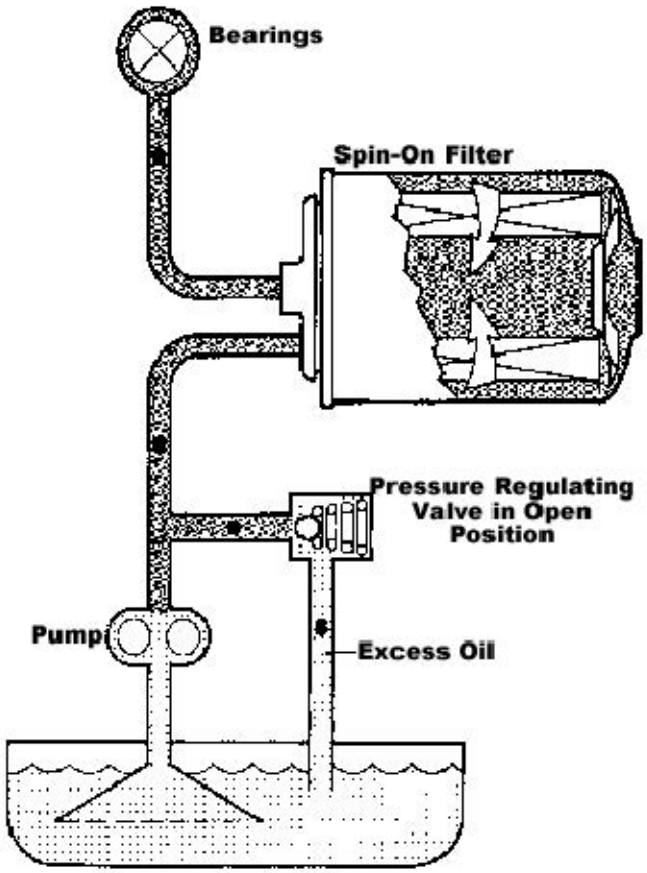

The customer may ask if a plugged filter could have caused the over pressurized condition. The answer is no; if the regulating valve is functioning properly it will maintain the pressure on the filter at 40 PSI (280 kPa) or 60 PSI (410 kPa) even if the filter is plugged.

In summary, if a lube filter distorts due to excessive pressure in the system, the fault lies with the oil pump pressure regulating valve and not with the filter.

Filtres à huile surpressurisés

De temps à autre, les fabricants de filtres reçoivent des filtres fortement surpressurisés. Souvent, le filtre déformé constitue le seul indice que le propriétaire de la voiture possède pour lui indiquer un problème dans le circuit de graissage.

Il est possible que le filtre endommagé ne soit pas remarqué avant la prochaine vidange d'huile. Si, toutefois, la pression a été suffisante pour déloger le joint ou dérouler le joint d'arrêt, le propriétaire de la voiture peut faire face à des problèmes immédiats et coûteux.

Avec la «preuve» en main, il aura tendance à accuser le filtre endommagé. Il n'est pas surprenant qu'il soit plus qu'irrité lorsque le fabricant de filtres nie toute responsabilité pour les dégâts. Alors, qu'est-ce qui a causé la surpressurisation?

Un coup d'œil sur la façon dont un circuit de graissage fonctionne démontre que la pression d'huile est engendrée par la pompe à huile. La limite la plus élevée de cette pression est contrôlée par une soupape régulatrice de pression, laquelle est normalement incorporée à la pompe. **La figure 1** constitue un schéma simplifié du circuit de graissage; on y voit la pompe, la soupape régulatrice, le filtre et les paliers.

La pompe fournit un débit suffisant pour lubrifier les paliers et autres pièces mobiles du moteur. Cette huile doit se trouver sous pression afin de séparer adéquatement les pièces lourdes du moteur et éviter une usure excessive. Le but de la soupape régulatrice est de fournir cette pression, laquelle, sur la plupart des voitures de tourisme, est de 280 à 410 kPa (40 à 60 lb/po^2).

La soupape régulatrice est composée d'une bille, ou plongeur, qui contrôle la pression à l'aide d'un ressort. Le ressort est calibré de façon à permettre au plongeur de se soulever de son siège lorsque la pression d'huile atteint un niveau voulu. Une fois la soupape ouverte, la pression demeure passablement uniforme avec seulement quelques variations suivant la vitesse du moteur.

Le filtre, de même que tous les autres organes du circuit de graissage, sont soumis à la pression établie par la soupape régulatrice. Si cette pression devient excessive, le filtre peut être endommagé. Pour certaines personnes ne connaissant pas ce type de circuit, cette situation est difficile à comprendre.

Filtres à huile surpressurisés

Quelle est la cause de cet excès de pression par rapport au réglage de la soupape régulatrice? La réponse : soit la soupape est coincée en position fermée, soit elle est lente et prend trop de temps à s'ouvrir une fois que le moteur a démarré.

La Figure 2 illustre le circuit fonctionnant avec la soupape régulatrice coincée en position fermée. Dans ces conditions, la pression s'accumule également sur tous les organes du circuit jusqu'à ce qu'il se produise quelque chose pour dissiper la pression. Si la soupape régulatrice se décoince, la pression revient à la normale.

Une pression de fonctionnement normale ne cause aucune déformation permanente sur le corps du filtre. Lorsque la pression du système atteint 1 000 kPa (150 lb/po^2) par suite d'une défectuosité dans la soupape régulatrice, la plupart des filtres se déforment d'une façon permanente. À ce niveau de pression, le joint ne lâchera pas et le joint d'arrêt restera en bon état.

Si la soupape régulatrice demeure toujours coincée, la pression augmentera de plus en plus et le joint se trouvant entre le filtre et la base peut lâcher, ce qui entraînera la perte de toute l'huile dans le circuit. Si le filtre a été installé bien serré, le joint peut ne pas lâcher et le joint d'arrêt se déroulera alors que la pression continue de monter. Le point le plus important à se rappeler est que le filtre déformé n'est pas la cause de cette pression excessive, mais plutôt le résultat d'une soupape régulatrice défectueuse.

Si le client réagit rapidement et qu'il éteint le moteur au premier signe de problème (voyant rouge allumé ou pression d'huile réduite), il peut limiter les dégâts et s'en tirer avec un simple remorquage de son véhicule, une vidange d'huile et un nouveau filtre.

S'il continue de conduire la voiture, le moteur tombera probablement en panne.

Le client demandera probablement si un filtre complètement bouché peut être la cause des conditions de surpression dans le circuit. La réponse est non. Si la soupape régulatrice fonctionne adéquatement, elle maintiendra la pression au filtre à entre 280 et 410 kPa (40 et 60 lb/po^2), même si le filtre est bouché.

En conclusion, si un filtre se déforme par suite d'une surpression dans le circuit, le problème provient de la soupape régulatrice et non du filtre.

Filtros de Aceite Sobrepresurizados

De vez en cuando todos los fabricantes de filtros han recibido de algún cliente un filtro que ha sido severamente sobrepresurizado. A menudo el filtro deformado (abombado) es la única señal que el propietario del carro tiene de que existió un problema en su sistema de lubricación de aceite.

Es posible que el filtro dañado no haya sido notado hasta que fue removido del vehículo en el siguiente cambio de aceite. Sin embargo, si la presión fue suficiente como para sacar la junta del carril o desengargolar la unión del bote, el propietario del carro habrá experimentado problemas inmediatos y costosos.

Con la "evidencia" en sus manos él culpa al filtro dañado. No es de sorprenderse que esté más que un poco irritado cuando el fabricante del filtro niega o rechaza cualquier responsabilidad en el daño. Entonces, ¿Que es lo que ha causado la sobrepresurización?

Al revisar como funciona el sistema de lubricación, vemos que la presión de aceite es creada por la bomba de aceite. El límite superior de esta presión está controlado por una válvula reguladora de presión, la cual, usualmente es una parte integral de la bomba.

La figura 1 es un diagrama simplificado del sistema de lubricación que muestra la bomba, la válvula reguladora, el filtro y las chumaceras.

La bomba suministra suficiente flujo para lubricar las chumaceras y las demás partes en movimiento del motor. El aceite debe estar bajo presión para separar las partes altamente cargadas del motor y prevenir el desgaste excesivo. El propósito de la válvula es regular esta presión, que en muchos carros de pasajeros está entre 40 psi (280 kPa) y 60 psi (410 kPa).

La válvula reguladora está compuesta por una esfera o un pistón que regula la presión con la ayuda de un resorte. El resorte está calibrado de tal manera que el pistón se levante de su asiento cuando la presión del aceite alcanza el valor deseado. Una vez que la válvula está abierta, la presión se mantiene prácticamente constante, con pequeñas variaciones debidas a la velocidad de giro del motor.

El filtro y todos los demás componentes del sistema de lubricación están sujetos a la presión establecida por la válvula reguladora. Si la presión es excesiva,

Filtros de Aceite Sobrepresurizados

puede ocurrir un daño en el filtro. Este es el punto que muchas personas que no están familiarizadas con el sistema de lubricación no toman en cuenta.

¿Que puede causar que la presión en el sistema exceda el ajuste de la válvula reguladora?. La respuesta es que la válvula debe haberse quedado pegada en posición cerrada o ésta se mueva muy lentamente a la posición de abierta después de que el motor ha arrancado.

La figura 2 muestra el sistema operando con la válvula de regulación pegada en la posición cerrada. Bajo esas condiciones la presión se incrementa igualmente en todos los componentes del sistema hasta que algo ocurre que libera la presión. Si la válvula de regulación se despega, la presión regresa a su valor normal. Si permanece pegada algo tendrá que romperse.

La presión de operación normal no causa deformaciones permanentes en el cuerpo del filtro. Cuando debido a la falla de la válvula reguladora, la presión del sistema alcanza 150 psi (1,000 kPa), la mayoría de los filtros se deforman permanentemente. A esta presión, la junta permanece en su carril y el engargolado del bote continúa sin fuga.

Si la válvula reguladora continúa pegada, la presión se incrementará y la junta entre el filtro y la base puede zafarse, esto probablemente causará la pérdida de todo el aceite del sistema.

Si el filtro se instaló muy apretado, la junta permanecerá en su lugar y el bote se desengargolará conforme la presión continúe subiendo.

Si el cliente está alerta y apaga el motor a la primera señal del problema (encendido de la luz roja o baja presión de aceite en el indicador), limitará su pérdida a un trabajo arrastre al taller, cambio de aceite y un filtro nuevo.

Si él continua la marcha hasta el taller más cercano, probablemente quemará el motor debido a la falta de aceite.

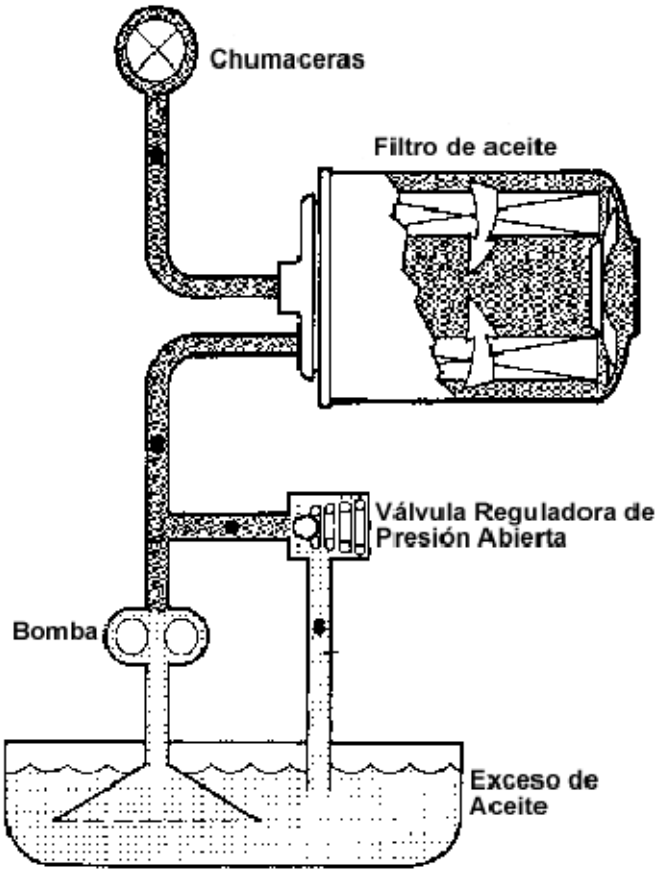

El punto principal es que el filtro deformado no es la causa de la presión excesiva, sino la víctima de una válvula reguladora defectuosa.

El cliente pudiera preguntar si un filtro completamente tapado puede causar las condiciones de sobrepresión en el sistema. La respuesta es no. Si la válvula reguladora está funcionando adecuadamente, ésta mantendrá la presión en el filtro a 40 psi (280 kPa) o 60 psi (410 kPa) aún si el filtro estuviera tapado.

En resumen, si un filtro se deforma debido a la sobrepresión en el sistema, la falla está en la válvula reguladora de presión y no en el filtro.

TECHNICAL SERVICE BULLETIN 85-1

Manufacturers' Warranty

Consumer purchasers of filters are sometimes told that an aftermarket brand of replacement filter cannot be used in the consumer's vehicle during the warranty period. The claim is made that use of an aftermarket brand will "void the warranty," with the statement or implication that only the original equipment brand of filters may be used. This tends to cast doubt on the quality of the aftermarket filter.

That claim is simply not true. If the consumer asks for the statement in writing, they will not receive it. Nevertheless, the consumer may feel uneasy about using replacement filters that are not original equipment. With the large number of consumers who prefer to use an aftermarket filter this misleading statement should be addressed.

Under the federal Magnuson-Moss Warranty Act, the Clean Air Act and general principles of the U.S. Federal Trade Commission Act, a manufacturer may not require the use of any brand of filter (or any other article) unless the manufacturer provides the item free of charge under the terms of the warranty.

If the consumer is told that only the original equipment filter will not void the warranty, they should request that the OE filter be supplied free of charge. If they are charged for the filter, the manufacturer may be violating the Magnuson-Moss Warranty Act or other applicable law.

By providing this information to consumers, the members of the Filter Manufacturers Council (FMC) intend to combat the erroneous claim that the use of a brand of replacement filter other than original equipment will "void the warranty."

It should be noted that the Magnuson-Moss Warranty Act is a U.S. federal law that applies to consumer products. The U.S. Federal Trade Commission has authority to enforce the Magnuson-Moss Warranty Act, including obtaining injunctions and orders containing affirmative relief. In addition, a consumer can bring suit under the Magnuson-Moss Warranty Act.

BULLETIN TECHNIQUE D'ENTRETIEN 85-1

Garantie du fabricant

Il arrive parfois chez un concessionnaire automobile qu'un préposé à la clientèle ou un mécanicien dise aux acheteurs de filtres d'automobiles de ne pas utiliser une certaine marque de filtre de rechange sur leur véhicule pendant la période de garantie, à l'effet que l'utilisation de cette marque «annulera la garantie», signifiant ou insinuant ainsi que seul l'emploi de la marque de filtre de l'équipement d'origine est acceptable. Il va sans dire que cette affirmation est de nature à semer le doute sur la qualité des filtres de rechange.

En fait, cette affirmation est tout simplement fausse. Si le consommateur en demandait une version écrite, il n'en recevrait aucune. Cependant, il peut se demander s'il fait un mauvais choix en utilisant des filtres de rechange qui ne sont pas de l'équipement d'origine. Comme il y a nombre élevé de bricoleurs qui préfèrent poser leurs propres filtres, cette affirmation erronée doit être rectifiée.

Selon la loi sur la garantie Magnuson-Moss Warranty Act et les principes généraux de la U.S. Federal Trade Commission Act, un fabricant ne peut exiger l'utilisation d'une marque de filtre quelconque (ou d'un autre article) à moins d'offrir cet article gratuitement en vertu de la garantie.

Donc, si le consommateur se fait dire que seul le filtre d'équipement d'origine n'annulera pas la garantie, il devrait exiger que ce filtre d'équipement d'origine lui soit offert gratuitement. Si on lui demande de payer ce filtre, le fabricant devient alors en infraction à la loi sur la garantie Magnuson-Moss ou à une autre loi qui s'applique.

En fournissant ce renseignement aux consommateurs, le Conseil des fabricants de filtres désire aider à combattre l'affirmation mensongère qu'une marque de filtre de rechange autre que celle offerte sur l'équipement d'origine «annule la garantie».

Il est important de noter que la loi sur la garantie Magnuson-Moss est une loi fédérale américaine concernant les produits de grande consommation. La U.S. Federal Trade Commission est habilitée à appliquer la loi sur la garantie Magnuson-Moss, y compris à demander des injonctions ou des ordonnances dans lesquelles il y a des mesures réparatrices. De plus, un consommateur peut entamer des poursuites en vertu de la loi sur la garantie Magnuson-Moss.

FILTER MANUFACTURERS fmc COMMUNITY

BOLETÍN DE SERVICIO TÉCNICO 85-1

Garantías de los Fabricantes

Algunas veces, los jefes del departamento mecánico o de servicio de las agencias les dicen a los consumidores que compran filtros automotrices, que no puede usarse, en el vehículo del consumidor, una marca de reemplazo durante el período de garantía. La exigencia es hecha en el sentido de que el uso de tal marca "anulará la garantía" y con la implicación de que sólo la marca original puede ser usada. Esto, por supuesto, tiende a sembrar una duda acerca de la calidad del filtro de reemplazo.

Esto simplemente no es cierto. Si el consumidor pide esto por escrito no lo recibirá. No obstante, el consumidor pudiera no sentirse a gusto al usar filtros de reemplazo que no sean marca original. Con el gran número de consumidores que prefieren hacer ellos mismos el cambio de filtros, esta engañosa exigencia debe ser aclarada.

Bajo el Acta de Garantías Magnuson-Moss y los principios generales del Acta de la Comisión Federal de Comercio, un fabricante no puede exigir el uso de cualquier marca de filtro (o cualquier otro artículo) a menos que el fabricante proporcione el artículo libre de cargo bajo los términos de la garantía.

De esta forma, si al consumidor se le dice que sólo el uso del filtro original no anulará la garantía, él debe exigir que el filtro original sea suministrado sin costo. Si a él se le cobra el filtro, el fabricante del vehículo estará violando el Acta de Garantías Magnuson-Moss u otras leyes aplicables.

Al proporcionar esta información a los consumidores, el FMC puede ayudar a combatir la errónea exigencia de que un filtro de reemplazo, diferente al original, "anulará la garantía".

Debe hacerse notar, que el Acta de Garantías Magnuson-Moss es una ley federal que aplica a productos de consumo. La Comisión Federal de Comercio tiene la autoridad para hacer cumplir el Acta de Garantías Magnuson-Moss, incluyendo la liberación de órdenes. Además, un consumir puede solicitar un juicio amparado en el Acta de Garantías Magnuson-Moss.

MANN+HUMMEL Filtration Technology US LLC

Limited Warranty

FILTERS
Any vehicle and equipment warranties you may have are not affected by proper use of WIX filters.

MANN+HUMMEL Filtration Technology US LLC ("we") warrants your WIX filter to be free from defects in materials and workmanship during the Warranty Period. The "Warranty Period" is the service interval for filter replacements recommended by the manufacturer of the engine or equipment. If your filter is found to be defective during the Warranty Period, we will, at our sole discretion, replace it with another WIX filter and/or reimburse you for the reasonable costs of the parts and labor required to repair your engine or equipment to the extent the damage is solely attributable to the defective filter.
If your application is not listed in the WIX catalog, this limited warranty applies ONLY if your filter is a valid cross-reference to the proper OEM filter as listed in the wixfilters.com online filter lookup, the WIX Filters app, the printed catalog or its electronic copy. It is your responsibility to determine the proper OEM filter for your application and the correct WIX cross reference to the OEM filter in the online filter lookup. We reserve the right to examine the filter, engine and/or equipment to verify the applicability of the cross-referenced OEM filter.

NON-FILTER PRODUCTS
Products other than filters are warranted to be free from defects in materials and workmanship for a period of one (1) year from the date of purchase.

WARRANTY SERVICE
To obtain warranty service, you must, within 30 days after discovery of damage, submit a claim to any WIX representative, your WIX distributor or directly to the address below. We reserve the right to examine the filter, engine and/or equipment to determine the extent of damage and whether it was caused by a defective WIX filter. We also reserve the right to examine any applicable service records, installation records, and receipts.

CONDITIONS
For filters, this limited warranty DOES NOT COVER:

- Filters submitted in a condition that prohibits evaluation and testing, such as a filter that has been deconstructed, disassembled or cut open;
- Use of the filter on an incorrect, non-approved or non-recommended application;
- Use of the filter in competitive racing, on modified high-performance engines, or on any aircraft or aviation application;
- Damage or failure caused by improper installation, misuse, modification, accidents or abuse;
- Use of motor oil other than the viscosity and type as recommended by the manufacturer of the engine or equipment;
- Costs of repairs not directly attributable to the defective filter;
- Towing fees, rental car fees, or any other fees, expenses, damages, costs or losses that are not specifically provided for in this Limited Warranty.

For products other than filters, this limited warranty DOES NOT COVER damage caused by:

- Improper installation, misuse, negligence, modification, accidents or abuse;
- Failure to follow the product instructions;
- Normal wear and tear.

THIS WARRANTY IS EXCLUSIVE OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED. THE REMEDIES DESCRIBED ABOVE ARE YOUR SOLE AND EXCLUSIVE REMEDIES AND OUR ENTIRE LIABILITY FOR ANY BREACH OF THIS LIMITED WARRANTY. UNDER NO CIRCUMSTANCES SHALL WE BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES WHATSOEVER, INCLUDING CLAIMS FOR LOSS OF USE OF THE ENGINE OR EQUIPMENT ON WHICH THE FILTER IS INSTALLED, LOSS OF TIME, INCONVENIENCE OR COMMERCIAL LOSS. WE LIMIT THE DURATION AND REMEDIES OF ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY. FOR FILTERS USED IN COMMERCIAL APPLICATIONS, AND EXCEPT WHERE PROHIBITED BY APPLICABLE LAW, WE EXPRESSLY DISCLAIM, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Some states and other local jurisdictions do not allow limitations on the duration of implied warranties or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state and other local jurisdictions.

Our WIX Limited Warranty shown above does not apply to WIX Industrial Filtration™, WIX RacingTM, ecoLAST®, ProTec® or products sold in China or Mexico.
Warranties for these products, as well as the Spanish and French translations, can be viewed at http://wixfilters.com/warranty.
For more information contact your District Sales Manager or the call the Product Information Team at the phone number listed at the beginning of this catalog.

MANN+HUMMEL Filtration Technology US LLC

GARANTIE LIMITÉE

FILTRES

Toute garantie de véhicule et d'équipement dont vous pourriez bénéficier n'est pas affectée par l'utilisation appropriée des filtres WIX. MANN+HUMMEL Filtration Technology US LLC (« nous ») garantit que votre filtre WIX est exempt de défaut de matériaux et de fabrication pendant la Période de garantie. La « Période de garantie » est l'intervalle de temps de service recommandé par le fabricant du moteur ou de l'équipement pour le remplacement du filtre. Si votre filtre s'avère défectueux pendant la Période de garantie, nous – à notre seule discrétion – le remplacerons par un autre filtre WIX et/ou vous rembourserons les coûts raisonnables des pièces et de la main-d'œuvre nécessaires pour réparer votre moteur ou votre équipement dans la mesure où le dommage est attribuable exclusivement au filtre défectueux.

Si votre utilisation ne figure pas dans le catalogue de WIX, cette garantie limitée s'applique UNIQUEMENT si votre filtre est un équivalent valide du filtre FEO approprié selon le répertoire de filtres disponible en ligne de wixfilters.com, dans l'application WIX Filters, dans le catalogue imprimé ou dans sa copie électronique. Il est de votre responsabilité de déterminer le filtre FEO approprié pour votre utilisation et l'équivalent WIX correcte du filtre FEO selon le répertoire de filtres en ligne. Nous nous réservons le droit d'examiner le filtre, le moteur et/ou l'équipement afin de vérifier l'applicabilité du filtre FEO équivalent.

AUTRES PRODUITS

Les produits autres que les filtres sont garantis contre tout défaut de matériaux et de fabrication pendant une période d'un (1) an à compter de la date d'achat.

SERVICE SOUS GARANTIE

Pour obtenir un service sous garantie, vous devez, dans les 30 jours suivant la découverte du dommage, soumettre une réclamation auprès d'un représentant de WIX, de votre distributeur WIX ou directement à l'adresse ci-dessous. Nous nous réservons le droit d'examiner le filtre, le moteur et/ou l'équipement pour déterminer l'étendue du dommage et si celui-ci a été causé par un filtre WIX défectueux. Nous nous réservons également le droit d'examiner tout dossier de services, tout dossier d'installation et tout reçu applicable.

CONDITIONS

Pour les filtres, cette garantie limitée NE COUVRE PAS :

- Les filtres remis dans un état qui empêche d'en faire l'évaluation et le test, tel qu'un filtre qui a été déconstruit, désassemblé, coupé ou ouvert;
- L'usage du filtre dans le cadre d'une application incorrecte, non approuvée ou non recommandée;
- L'usage du filtre dans le cadre de courses de compétition, sur des moteurs à haute performance modifiés, ou sur des aéronefs ou à des fins d'aviation;
- Le dommage ou la défaillance causé par une installation incorrecte, une mauvaise utilisation, une modification, un accident ou un abus;
- L'utilisation d'une huile à moteur dont la viscosité et le type diffèrent des recommandations du fabricant du moteur ou de l'équipement;
- Les coûts de réparation qui ne sont pas directement attribuables au filtre défectueux;
- Les frais de remorquage, de location de voiture, ou tout autres frais, dépenses, dommages, coûts ou pertes qui ne sont pas spécifiquement prévus par la présente Garantie limitée.

Pour les produits autres que les filtres, cette garantie limitée NE COUVRE PAS le dommage causé par:

- Une installation incorrecte, une mauvaise utilisation, une négligence, une modification, un accident ou un abus;
- Le non-respect des instructions du produit;
- L'usure normale.

CETTE GARANTIE EST EXCLUSIVE DE TOUTE AUTRE GARANTIE, EXPRESSE OU IMPLICITE. LES RECOURS DÉCRITS CI-DESSUS SONT VOS SEULS ET UNIQUES RECOURS ET NOTRE ENTIÈRE RESPONSABILITÉ POUR TOUTE VIOLATION DE CETTE GARANTIE LIMITÉE. NOUS NE SERONS RESPONSABLES EN AUCUN CAS DE DOMMAGES SPÉCIAUX, INCIDENTS OU INDIRECTS DE QUELQUE NATURE QUE CE SOIT, Y COMPRIS LES RÉCLAMATIONS POUR PERTE D'UTILISATION DU MOTEUR OU DE L'ÉQUIPEMENT SUR LEQUEL LE FILTRE EST INSTALLÉ, PERTE DE TEMPS, DÉSAGRÉMENT OU PERTE COMMERCIALE. NOUS LIMITONS LA DURÉE DE TOUTE GARANTIE IMPLICITE ET LES RECOURS QUI EN DÉCOULENT, Y COMPRIS, SANS LIMITATION, LES GARANTIES DE QUALITÉ MARCHANDE ET D'ADÉQUATION À UN USAGE PARTICULIER, À LA DURÉE DE LA PRÉSENTE GARANTIE LIMITÉE EXPRESSE. POUR LES FILTRES UTILISÉS À DES FINS COMMERCIALES, ET SAUF SI LA LOI APPLICABLE L'INTERDIT, NOUS DÉCLINONS EXPRESSÉMENT, SANS LIMITATION, LES GARANTIES IMPLICITES DE QUALITÉ MARCHANDE ET D'ADÉQUATION À UN USAGE PARTICULIER.

Certains états et d'autres juridictions locales interdisent la limitation de la durée des garanties implicites ou l'exclusion ou la limitation des dommages accessoires ou indirects, de sorte que les limitations ou exclusions ci-dessus peuvent ne pas s'appliquer à vous. Cette garantie vous donne des droits légaux spécifiques et vous pouvez également avoir d'autres droits qui varient selon état et la juridiction locale.

Notre Garantie limitée WIX présentée ci-dessus ne s'applique pas aux produits de WIX Industrial Filtration™, WIX Racing™, ecoLAST®, ProTec® ou aux produits vendus en Chine ou au Mexique. Les garanties relatives à ces produits, ainsi que les traductions en espagnol et en anglais, peuvent être consultées sur le site http://wixfilters.com/warranty. Pour plus d'informations, contactez votre Directeur régional des ventes ou l'Équipe d'information sur les produits au numéro de téléphone indiqué au début de ce catalogue.

Révision 02/2022

MANN+HUMMEL Filtration Technology US LLC

GARANTÍA LIMITADA

FILTROS
Cualquier garantía de vehículos y equipos que pueda usted tener no se verá afectada por el uso adecuado de los filtros WIX.

MANN+HUMMEL Filtration Technology US LLC ("nosotros") garantiza que sus filtros WIX están libres de defectos en materiales y mano de obra durante el Período de Garantía. El "Período de Garantía" es el intervalo de los servicios para llevar a cabo los reemplazos de filtros recomendados por el fabricante del motor o equipo. Si durante el Período de Garantía se determina que su filtro es defectuoso, a nuestro exclusivo criterio lo reemplazaremos por otro filtro WIX y/o le reembolsaremos los costos razonables de las piezas y la mano de obra necesarios para reparar su motor o equipo en la medida en que el daño sea atribuible únicamente al filtro defectuoso.
Si su aplicación no figura en el catálogo de WIX, esta garantía limitada SOLAMENTE aplica si su filtro es una referencia cruzada válida al filtro-OEM adecuado de acuerdo a la lista en el buscador de filtros en línea en wixfilters.com, en la aplicación de Filtros WIX, en el catálogo impreso o su copia electrónica. Es su responsabilidad determinar el filtro-OEM adecuado para su aplicación y la correcta referencia cruzada a WIX en el buscador de filtros en línea. Nos reservamos el derecho de examinar el filtro, el motor y / o el equipo para verificar la aplicabilidad del filtro-OEM con referencia cruzada.

PRODUCTOS DISTINTOS A FILTROS
Los productos que no sean filtros están garantizados contra defectos de materiales y mano de obra durante un período de un (1) año a partir de la fecha de compra.

SERVICIO DE GARANTÍA
Para obtener el servicio de garantía, usted deberá presentar la reclamación al representante de WIX, a su distribuidor WIX o directamente a la dirección indicada abajo, dentro de los 30 días posteriores al descubrimiento del daño. Nos reservamos el derecho de examinar el filtro, el motor y/o el equipo para determinar la extensión del daño y si éste fue causado por un filtro WIX defectuoso. También nos reservamos el derecho de examinar los correspondientes registros de servicios, registros de instalación y recibos.

CONDICIONES
Para los filtros, esta garantía limitada NO CUBRE:

- Filtros presentados en condiciones que impidan la evaluación y las pruebas, como podría ser un filtro que se ha deconstruido, desmontado o cortado para abrirlo;
- Uso del filtro en una aplicación incorrecta, no aprobada o no recomendada;
- Uso del filtro en carreras, en motores modificados de alto rendimiento o en cualquier aeronave o aplicación de aviación;
- Daños o fallas causados por instalación incorrecta, mal uso, modificación, accidentes o abuso;
- Uso de aceite de motor que tenga una viscosidad y tipo distintos a los recomendados por el fabricante del motor o equipo;
- Costos de reparaciones no directamente atribuibles al filtro defectuoso;
- Gastos de remolque, tarifas de alquiler de automóviles o cualquier otro honorario, gasto, daño, costo o pérdida que no estén específicamente previstos en esta Garantía Limitada.

Para productos distintos a los filtros, esta garantía limitada NO CUBRE daños causados por:

- Instalación inadecuada, mal uso, negligencia, modificación, accidentes o abuso;
- No seguir las instrucciones del producto;
- Uso y desgaste normal.

ESTA GARANTÍA EXCLUYE CUALQUIER OTRA GARANTÍA, EXPRESA O IMPLÍCITA. LOS RECURSOS ANTES DESCRITOS SON SUS ÚNICOS Y EXCLUSIVOS RECURSOS Y NUESTRA RESPONSABILIDAD TOTAL POR CUALQUIER INCUMPLIMIENTO DE ESTA GARANTÍA LIMITADA. BAJO NINGUNA CIRCUNSTANCIA SEREMOS RESPONSABLES DE CUALQUIER DAÑO ESPECIAL, INCIDENTAL O CONSECUENCIAL, INCLUYENDO RECLAMACIONES POR PÉRDIDA DE USO DEL MOTOR O EQUIPO EN EL QUE ESTÁ INSTALADO EL FILTRO, PÉRDIDA DE TIEMPO, INCONVENIENCIA O PÉRDIDA COMERCIAL. LIMITAMOS LA DURACIÓN Y LOS RECURSOS BAJO TODAS LAS GARANTÍAS IMPLÍCITAS, INCLUYENDO SIN LIMITACIÓN LAS GARANTÍAS DE COMERCIABILIDAD Y APTITUD PARA UN PROPÓSITO PARTICULAR, A LA DURACIÓN DE ESTA GARANTÍA LIMITADA EXPRESA. PARA LOS FILTROS UTILIZADOS EN APLICACIONES COMERCIALES, Y EXCEPTO QUE ESTÉ PROHIBIDO POR LA LEY APLICABLE, RECHAZAMOS EXPRESAMENTE, SIN LIMITACIÓN, LAS GARANTÍAS IMPLÍCITAS DE COMERCIABILIDAD Y APTITUD PARA UN PROPÓSITO PARTICULAR.

Algunos estados y otras jurisdicciones locales no permiten limitaciones a la vigencia de garantías implícitas o la exclusión o limitación de daños incidentales o consecuenciales, por lo que las limitaciones o exclusiones anteriores podrían no ser aplicables para usted. Esta garantía le otorga derechos legales específicos y también podría tener otros derechos que varían de un estado a otro y otras jurisdicciones locales.

Nuestra Garantía Limitada WIX señalada arriba no aplica para WIX Industrial FiltrationTM, WIX RacingTM, ecoLAST®, ProTec® o productos vendidos en China o México. Las garantías para dichos productos, así como sus traducciones al español y francés, pueden consultarse en http://wixfilters.com/warranty. Para obtener más información, comuníquese con su Gerente de Ventas de Distrito o llame al Equipo de Información de Productos al número telefónico señalado al principio de este catálogo.
